GUTHION SOLUPAK

Application by fixed wing aircraft on apples, pears and peaches in Idaho

EPA REG. NO. 3125-301 EPA SLN NO. ID-00006

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. This labeling must be in the possession of the user at the time of application. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered Guthion Solupak label.

CROP	INSECT	POUNDS USE DIRECTIONS	
		GUTHION SOLUPAK	USE DIRECTIONS
Apples Crab apples Pears	Codling moth	2 to 3	Apply specified dosage per acre by fixed-wing aircraft in sufficient water for good coverage. Up to 9 pounds GUTHION SOLUPAK may be applied per crop season. Allow at least 7 days between applications and 14 days between last application and harvest. For apples, if last application is greater than 2 pounds per, allow 21 days between last application and harvest. Applications made at
			rates above 2 pounds per acre can only be made in conjunction with an Integrated Pest Management (IPM) program.
Peaches	Lesser peach tree borer, oriental fruit moth, peach twig borer, peach tree borer, Platynota flavidana leaf roller, plum curculio, redbanded leaf roller, stink bug, thrips, tarnished plant bug	3 to 4	Apply specified dosage per acre. Allow at least 14 days between applications. A total of 6-3/4 pounds per acre per crop season may be applied to peaches. Allow at least 21 days between last application and harvest.

GUTHION SOLUPAK is compatible with dormant and summer oils, which may be added to apple and pear sprays in accordance with local recommendations.

RESTRICTION: Application by chemigation is prohibited.

NOTE: It is suggested that when treating fruit during the bloom period, bee keepers should be warned well in advance to remove hives a safe distance from orchards to be treated.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) listed in the chart below.

CROP	ACTIVITY	REI
Tree Crops (except citrus)	Hand Thinning, Hand Harvesting	14 days
	Propping, Mowing, Irrigating, Scouting, Other activities	48 hours

Waiver of Liability: Bayer's Special Conditions and Disclaimer for use of Guthion Solupak by fixed wing aircraft on apples, pears and peaches.

Bayer intends that this Section 24(c) label be distributed by the Pacific Northwest Aerial Applicators Alliance (PNWAAA) only to end users and/or growers who agree in writing to the terms and conditions required by the PNWAAA including a waiver and release from all liability and indemnification by the user and/or grower of Bayer, PNWAAA, and others for failure to perform and crop damage from the use of Guthion Solupak on apples, pears and peaches. If such terms and conditions are unacceptable, return Guthion Solupak at once unopened.

This product when used on apples, pears and peaches may lead to crop injury, loss, or damage. Bayer recommends that the user and/or grower test this product in order to determine its suitability for such intended use. The PNWAAA and Bayer make this product available to the user and/or grower solely to the extent the benefit and utility, in the sole opinion of the user and/or grower, outweigh the extent of potential injury associated with the use of this product. The decision to use or not to use this Guthion Solupak must be made by each individual Guthion Solupak user and/or grower on the basis of possible crop injury from Guthion Solupak, the severity of Codling Moth infestation, the cost of alternative Codling Moth controls, and other factors. Bayer intends that because of the risk of failure to perform or crop damage that all such use is at the user's and/or grower's risk.
